TESI DI LAUREA MAGISTRALE IN
ELECTRONICS ENGINEERING - INGEGNERIA ELETTRONICA

Nome Cognome, codice persona

Advisor:
Prof. Nicola Lusardi

Co-Advisors:
Dr. Nicola Corna
Dr. Fabio Garzetti

Academic Year:
2021-2022

Abstract: Here goes the Abstract in English of your thesis (in article format) followed by a list of keywords. The Abstract is a concise summary of the content of the thesis (single page of text) and a guide to the most important contributions included in your thesis. The Abstract is the very last thing you write. It should be a self-contained text and should be clear to someone who hasn't (yet) read the whole manuscript. The Abstract should contain the answers to the main research questions that have been addressed in your thesis. It needs to summarize the motivations and the adopted approach as well as the findings of your work and their relevance and impact. The Abstract is the part appearing in the record of your thesis inside POLITesi, the Digital Archive of PhD and Master Theses (Laurea Magistrale) of Politecnico di Milano. The Abstract will be followed by a list of four to six keywords. Keywords are a tool to help indexers and search engines to find relevant documents. To be relevant and effective, keywords must be chosen carefully. They should represent the content of your work and be specific to your field or sub-field. Keywords may be a single word or two to four words.
some citations to check bibliography [1]

Key-words: insert keyword list

1. Introduction

2. State of the Art

3. Main Work

4. Measures

5. Conclusions
